For items 1-8, write down the correct word. For items 9-20, circle the correct option.

1	decorate +				
2	down -				
3	back +				
4	been -				
5	in +				
6	as +				
7	changed +				
8	both +				
9	(A)	B	C	D	+
10	A	(B)	C	D	+
11	A	B	(C)	D	+
12	A	B	C	(D)	+
13	A	B	(C)	D	+
14	(A)	B	C	D	+
15	(A)	B	C	D	-
16	(A)	B	C	D	+
17	A	B	(C)	D	+
18	A	(B)	C	D	+
19	(A)	B	C	D	+
20	A	B	C	(D)	+

Many centuries ago Aristotle said, "A friend to all is a friend to none." It was true back then and it is still.

Who is a friend? It is a person who is always here to give you a hand. Friends treasure one another, they try to do their best to make each other's lives better.

The question is, can one person be a friend to all?

I believe it is not possible. Firstly, I would like to mention a common truth - everyone is different. You'll never find to absolutely alike <sup>Lex</sup> <sub>Lex</sub> people. So, how can one person get on well with everyone at once? Secondly, a real friend will always take your side, but how can "a friend to all" take sides? Lastly, personally I believe that friendship is a very personal thing. The very word friend means a lot to me, so I can't imagine using it towards everybody. I am sure it will lose its meaning this way.

In conclusion, I would like to say that <sup>Pun</sup> Aristotle, of course, was right. No one can be a friend to all.

$$3 + 2 + 2 + 2 + 1 = 10$$
