Report on teenager's healthy habits

The purpose of this report is to analyze the data received from a survey and to give some useful recommendations for students.

Results of the survey

The survey was conducted among teenage students of my school. Its results were quite predictable. Almost no one reduces time on phone or computer. Rarely do teenagers think about their sight, which could get worse. However, the vast majority of students ban smoking and alcohol.

Cr

Differences between males and females

The survey also shows that almost every teenage girl controls her weight, while boys don't think it is necessary. Moreover, almost half of girls are tend to ban fast food, while boys still eat it.

Recommendations

As the survey showed, boys aren't tend to control their weight. This may lead to serious health problems such as obesity. So I will advise boys to control their weight. As for the girls, doing sports and exercises is useful for to keep you fit, so I will recommend girls you to take up some sports if you don't already do one.

Conclusion

To conclude, the survey has already shown that students lead quiet healthy life style, but if they will follow my recommendations, their life will become even better and healthier.
