For my project on a healthy lifestyle, I decided to find out what healthy habits our students adhere to. To do this, I conducted a survey among the teenage students.

Most of the students said that they do not smoke or drink alcohol, as well as they do sports and exercises. Less than 10 percent of students reduce their time on phones and computers, and less than 30 percent observe a healthy 8-hour sleep.

Compared to boys, girls are more careful about their weight. They follow a balanced diet and do not eat fast food. However, boys are more likely to do sports than girls.

Since my project is aimed at identifying and maintaining a healthy lifestyle, I will give some recommendations. For girls, I recommend regular exercising, as it is more effective than regular diets. You should not eat too little, it can lead to health problems. Boys should maintain a normal body weight and eat foods low in animal fat. So when you exercise, try to limit yourself to fast food.

To sum up, most students lead a healthy lifestyle. However, I have a general recommendation for everyone: use gadgets less and sleep more, it will improve your productivity and you will feel healthier.
