Following healthy lifestyle habits  
by teenage students

There is no secret that the majority of modern teenagers suffer from the health problems nowadays. But what does cause such statistic and can people influence on it.

Recently I have made a research and conducted a survey among the students of my school. According to the results, the substantial problem of modern teenagers is electronic devices. Fewer than 5% of contestants of the survey manage to reduce the time on them! But it is quite pleasing that more than 70% of boys and girls avoid smoking and drinking alcohol.

By the way, it is self-evident that the majority of girls try to follow healthy lifestyle habits comparing to boys. For example, 90% of females control their weight by avoiding fast food and having a balanced diet, and only 25% of boys do the same thing. However, more than 80% of guys do sport and fewer do girls.

Personally, I would recommend girl females to try to be <sup>keep</sup> fit being fit. And boys should sleep

more, create a balanced diet and avoid fast food.

To sum up, the results are not really disappointing  
by the way <sup>many</sup> ~~most~~ teenagers try to follow healthy lifestyle  
and take care of their own health.
